

## Position on IT

---

**Introduction** The overall use of Information Technology enables Chr. Hansen to conduct our business and make sound business decisions based on facts and thus provide open and honest information.

---

### Statements

#### **Competitive advantage**

- We implement and use IT systems and applications in order to obtain a competitive advantage for the business, provide decision makers with information, automate administration and enable electronic integration with customers and suppliers.

#### **Standardized technology**

- We use standardized and proven technologies wherever possible, to ensure as much simplification, security and stability of the IT architecture as possible.

#### **Security**

- We operate our IT infrastructure and systems to ensure high accessibility while at the same time avoiding unintentional or undesirable use.

#### **Governance model**

- We have implemented a corporate IT governance model to ensure management prioritization, resource allocation and commitment from stakeholders to the most business critical IT projects and global processes.

#### **Infrastructure**

- We operate the IT infrastructure and IT systems according to common guidelines and business needs in order to achieve the necessary internal and external business integration as well as best possible quality level.
- 

### Scope

This corporate position shall be followed by Chr. Hansen Holding A/S and all its subsidiaries and controlled businesses globally.
